Jitendra Pathariya

Senior Developer at Baillie Gifford | .NET, APIs, Azure Integration & Enterprise Systems
Glasgow, Scotland, United Kingdom

Summary

Senior Application Developer at Baillie Gifford with nearly 20 years of experience delivering enterprise software solutions across investment management and financial services domains. My experience spans legacy and modern platforms, including C#, .NET, Oracle, WPF, APIs, Azure integrations, Power Automate and enterprise application modernisation initiatives. I enjoy working across the full development lifecycle - from analysis and design through development, testing, release, and production support. Over the years, I have worked closely with business users, supported complex production systems, mentored newer team members, and contributed to cross-functional technical delivery across a wide range of applications and technologies. I'm particularly interested in building reliable, maintainable solutions and continuously improving systems, processes, and user experience through practical and collaborative engineering.

Experience

Baillie Gifford

4 years 11 months

Senior Application Developer

May 2026 - Present (5 months)

Edinburgh

- Delivering end-to-end development across enterprise investment and business systems, from analysis and design through implementation, testing, release, and production support.
- Working across both legacy and modern technology stacks including C#, .NET, Oracle, WPF, APIs, Azure Service Bus integrations, Power Automate, and enterprise application modernisation initiatives.

- Supporting live production environments, managing controlled releases, troubleshooting issues, and contributing to reliable and maintainable software solutions.
- Collaborating closely with business users, analysts, developers, and cross-functional teams to deliver enhancements, integrations, and process improvements.
- Mentoring newer team members and supporting technical onboarding, knowledge sharing, and collaborative delivery across the team.
